The eVinci™ Microreactor is a Game-changer for Canada.

Westinghouse is proud to support the Saskatchewan Research Council as they pursue licensing to demonstrate and operate the first eVinci™ microreactor in Canada.

This innovative technology will help Saskatchewan meet their unique energy goals while creating new opportunities for economic development.

Shaping tomorrow’s energy for a better future. That’s Westinghouse. Visit westinghousenuclear.com/evinci to learn more.

Representatives of the Government of Saskatchewan, SRC, Cameco and Westinghouse at the recent funding announcement ceremony.

Government of Saskatchewan representative Premier Scott Moe speaking in front of a full-scale model of an eVinci microreactor.
