

30% of Sites. One Mission. Thank You.

Your trust in our expertise has been instrumental.

Thanks to your trust and partnership, our RADMAN™ Shipping Command Center now supports nearly one-third of all domestic sites. Every shipment, every solution, every success - it's all possible because of you. We're proud to stand behind your mission with reliable, innovative and regulation assured waste shipping coordination. Here's to expanding what's possible - together.

Expert Support

24/7 Availability

Full-Service Solutions

With over 45 years of industry experience, our subject matter experts provide comprehensive assistance in all aspects of radioactive waste management.

From waste characterization and classification to transportation logistics and disposal coordination, we ensure compliance with federal regulations and industry best practices. Our team works closely with plant personnel to streamline processes, mitigate human performance errors, and provide technical expertise that enhances operational efficiency. Whether you need guidance on NRC documentation, waste profiling, or cask loading procedures, our experts are here to ensure your success.
