

the same rigorous safety standards that have occurred for over six decades of power operation in the U.S.—these will be key to everyone’s success.

While we have seen some setbacks in the industry with projects, they are just bumps on a long road to future deployment. The path forward is familiar for those of us who have worked at an operating reactor site: safety, following processes and procedures,

training, rigorous inspections, and compliance to the highest level of excellence in our work, as well as sharing experience across the industry.

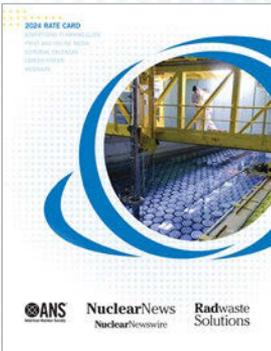

As the tide turns and the boats begin to rise in the nuclear industry, I look forward to the success of the whole fleet, because if we all succeed, the world ultimately wins. ☒

## 2024 Editorial Calendar & Rate Card is now available!

How does your company plan to market themselves to the worldwide nuclear community in 2024 and beyond?

For more than 60 years that answer has remained the same—**Nuclear News** magazine and the affiliated print and digital publications offered by the American Nuclear Society.
