

Upgrade your I&C *with confidence*

When it's time to modernize your plant, you can depend on Framatome. We offer an unmatched breadth of instrumentation and control (I&C) modernization solutions — spanning safety and non-safety systems, analog and digital technologies, and both nuclear island and balance of plant applications.

Our solutions are designed and supported by the world's largest I&C organization, with more than 2,700 professionals and over 440 comprehensive I&C installations worldwide, including more than 250 digital safety I&C systems.

Backed by a robust, qualified multi-country supply chain, we help reduce project risk today, and well into the future. With a culture rooted in project execution based on transparency and shared commitment, Framatome is the best choice for I&C system modernizations.

Count on it.
