

framatome

Advanced Reactor and SMR Support

Powered by experience *Built for what's next*

For more than six decades, Framatome has delivered the fuel, instrumentation and control, components and engineering expertise nuclear operators can count on. Today, that experience is accelerating innovation as we're advancing technologies that will power the future.

Collaborating with developers, utilities and government partners, Framatome brings proven capabilities to advanced reactor technologies. We're helping teams move from concept to deployment with confidence.

Count on it.
