

## Choose your I&C solutions *with confidence*

The NRC's Safety Evaluation Report (SER) for Framatome's TXS Compact platform gives plant operators and reactor designers something invaluable: independent confirmation that our digital safety technology meets the industry's highest regulatory expectations. This rigorous technical review simplifies the decision-making process for modernization and new-build projects.

Choosing Framatome I&C solutions like FPGA-based TXS Compact and the fully analog Hardline means choosing qualified, diverse and future-ready safety systems. All backed by more than 65 years of nuclear experience and the industry's largest I&C team so your plant can operate with confidence for the long term.

*Count on it.*
