Crank it up to 11!

Has your power generation hit a plateau? Now, when energy demands have never been greater, it's time to turn the dial past 10.

ATRIUM 11, our most advanced boiling water reactor fuel design, will maximize your operations and provide the flexibility needed to unlock your core's potential. With more than 10 years of operating experience and 5,000 fuel assemblies in operation, ATRIUM 11 is proven to mitigate rising costs with superior uranium utilization and has unmatched protection from debris-related interruptions. Experience the power. Crank it up to 11!

Count on it.
