

Leave no
stone unturned,
without moving
an inch of dirt.

The GE Hitachi Surveyor™ ultrasonic robot provides thorough, cost-effective buried pipe inspection without digging.

To ensure piping system integrity in today's facilities, the GE Hitachi Buried Inspection Surveyor robot is a proven solution to inspect pipes from the inside. Self-propelled and capable of traveling up to 1,000 ft. and navigating 90-degree turns, Surveyor uses on-board cameras, electromagnetic and ultrasonic technology to deliver real-time data for comprehensive inspection.

Get an in-depth look at how Surveyor can help prevent failures and ensure continuous service at nuclear.gepower.com/surveyor.
