If paper reactors aren’t enough, join INL and help us build something amazing.

INL is a place of engineering firsts:

- The first reactor to generate usable electricity
- The first reactor to light a city
- Dozens of first-of-a-kind demonstrations
- First steady-state and transient test reactors

Now we’re doing it again, preparing for:

- The first modern microreactor
- The first fast-spectrum molten salt reactor
- The first advanced reactor commercial demonstrations
- The first integrated energy system test bed

We offer flexible schedules, relocation packages, competitive salaries and other benefits, in one of the fastest-growing states in the country. Apply now at https://inl.gov/careers
