

Joining ANS in signing the letter were the Breakthrough Institute, Center for Climate and Energy Solutions, ClearPath Action, Decommissioning Plant Coalition, Energy Communities Alliance, Good Energy

Collective, The Nature Conservancy, Nuclear Innovation Alliance, Nuclear Waste Strategy Coalition, Third Way, and the U.S. Nuclear Industry Council.

## NUCLEAR LEGACY

We welcome ANS members who have careered in the community to submit their own Nuclear Legacy stories, so that the personal history of nuclear science and technology can be captured. For information on submitting your stories, contact [nucnews@ans.org](mailto:nucnews@ans.org).

### N. Prasad Kadambi—ANS member since 1972

I graduated with a mechanical engineering degree from Osmania University in Hyderabad, India, and took up nuclear engineering when I was awarded a scholarship by an organization called His Exalted Highness The Nizam of Hyderabad's Charitable Trust. That scholarship enabled me to do graduate work at Pennsylvania State University, and

I enrolled there in 1966. One of the terms of the scholarship was that I return to India after graduation. Hence, I returned to India in 1972 after receiving my Ph.D. and began working at the Bhabha Atomic Research Centre in Mumbai.
