

PeAks+ AI: transforming the nuclear industry

It's the most innovative nuclear solution over the past three decades. Our team is leading the charge.

Leveraging the power of AI, Paragon has used millions of inventory records and work orders to identify risk in Long Lead Time parts.

PeAks+ AI is the only tool in the nuclear industry that uses real-time industry data to make critical decisions on parts availability and inventory management.

Talk to our team today.

Think Collaboration.
Think Innovation.
Think Paragon.
