Powering Nuclear Progress

Nuclear operators need more than a vendor—they need an experienced partner to advance the industry alongside them. Mirion Nuclear Solutions unites three trusted names into one expert team.

Paragon delivers mission-critical equipment, obsolescence strategies, and innovative engineering for today's fleet and next-generation reactors. Mirion Technologies brings proven, world-class radiation safety and measurement solutions across the full plant lifecycle. Certrec provides regulatory compliance and digital integration expertise to keep plants secure and audit-ready.

Together, we form a single, comprehensive solution built to power nuclear progress—today and tomorrow.

Three Leaders. One Partner.
