

One partner. Every I&C challenge.

Dr. Yvotte Brits
Chief Reactor Technology Officer

Our Energy Future is Nuclear. Paragon is Proud to Power It.

From legacy control system upgrades to first-of-a-kind advanced reactor systems, Paragon is the single source for everything instrumentation and control.

We design, engineer, qualify, and support mission-critical I&C solutions—including our NRC SER-approved HIPS platform, neutron flux monitoring, and bespoke process control systems.

Whatever the reactor, whatever the challenge, Paragon has the expertise, the technology, and the track record to deliver.
