

I&C solutions for nuclear power plants from Siemens Energy

Built on over 60 years of nuclear expertise, our instrumentation and control systems are designed to optimize efficiency and performance while focusing on safety and reliability. Acting as the central hub in nuclear power plants, our I&C solutions

deliver precise real-time monitoring and control across all plant systems while maintaining highest cybersecurity standards – for stable operations 24/7. We prepare your assets for future-ready digitalization.

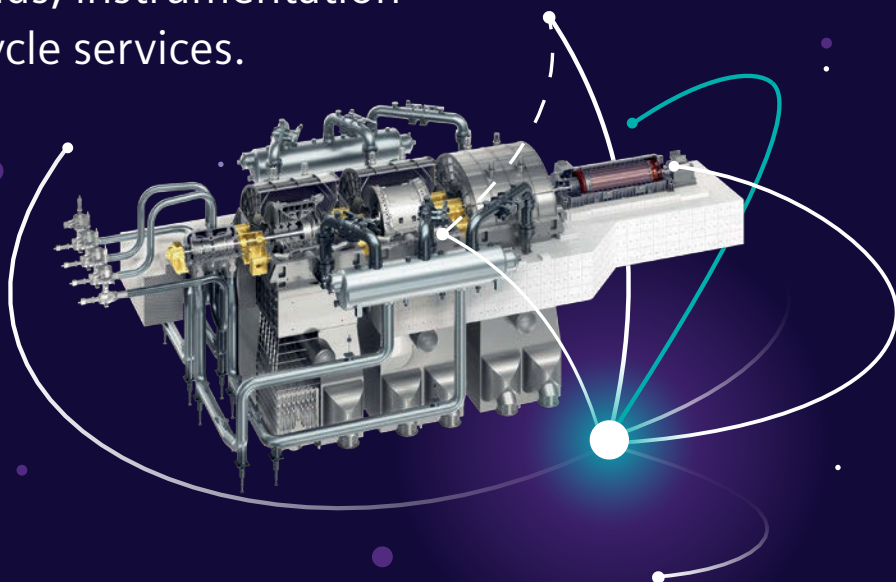

LET'S MAKE TOMORROW DIFFERENT TODAY

We power your nuclear plant

with conventional islands, instrumentation and controls, and lifecycle services.
