

We Build More than Just Ships. We Build Solutions.
HII Nuclear and Environmental Group Renames Business Units

Huntington Ingalls Industries (HII) is well-known as America's largest military shipbuilding company, but there is a lot more to the company than building nuclear and conventionally-powered ships for the United States Navy and Coast Guard. To demonstrate a firm commitment to non-shipbuilding services, HII formed the Technical Solutions division, home of the Nuclear & Environmental Group (N&EG).

Comprised of HII Nuclear (formerly, Stoller Newport News Nuclear (SN3)) and HII Mechanical (formerly, Newport News Industrial (NNI)) N&EG is focused on improving our nation's security. We do this by supporting the national security mission of the Department of Energy (DOE), fabricating nuclear quality components for the only new nuclear units being constructed in the country and Boiler Water Circulating Pump repairs and rebuilds for the fossil industry, as well as valve repairs and testing for the Department of Defense and commercial markets.

Changing our legal business unit names to HII Nuclear and HII Mechanical has allowed us to harmonize our branding strategy with our corporation's legacy of successfully managing simultaneous complex

nuclear projects based in shipbuilding. That knowledge is applied to the DOE and commercial nuclear markets through N&EG. We apply our disciplined nuclear operations culture, forged through decades of excellence, in the most complex projects ever undertaken in the global marketplace.

As a company, we believe that we contribute to our national security by executing with distinction every single day. We believe in being a good partner and in building relationships based on mutual trust and respect, founded in integrity. Finally, we believe in the value of open communication and the undeniable value of an ethical, diverse, inclusive and safe work environment.

Our full range of services include:

- Nuclear Management and Operations
- Site and Facility Restoration
- Environmental Services
- High Complexity Program Management
- Nuclear and Non-Nuclear Fabrication and Equipment Repair

- Nuclear and Non-Nuclear Modular Construction

N&EG consistently achieves project performance success at all levels. We offer innovative strategies resulting in safe, high-quality, on time, on budget delivery to our customers.

- VPP Star status and excellent safety performance
- 300+ nuclear projects safely delivered
- Over 2,000 projects performed for DOE

N&EG has a reputation for delivering results that go beyond expectations, creating a solid foundation of trust and reliability with our customers and partners.
