

EVERY REACTOR NEEDS MORE THAN CONTROLS. IT NEEDS CONFIDENCE.

From advanced reactors to operating nuclear plants, RSCS supports the monitoring, calibration, radiological, and compliance infrastructure that keeps facilities operational, compliant, and audit-ready.

RSCS is that partner.

For more than 35 years, RSCS has provided industry-leading radiological project management, decommissioning support, environmental & subsurface investigation, calibration services, and accredited training for utilities across the United States. We help operators reduce risk, enhance safety performance, and optimize decision-making through:

Supporting All Phases of the Nuclear Cycle

- Effluent Monitoring Systems
- Radiation Monitoring & Detection
- ISO/IEC 17025 Calibration
- Environmental & Groundwater Monitoring
- Radiological Engineering Support
- Staffing & Technical Services

Learn how RSCS and the Allied Power Platform are supporting the next generation of nuclear innovation.
