

PROVEN RADIOLOGICAL EXPERTISE

ACROSS THE ENTIRE NUCLEAR POWER LIFECYCLE

RSCS supports every stage of the nuclear fuel cycle from new plant construction to ongoing operations and decommissioning. Whether you require routine program support or specialized project services, our team delivers efficient, cost-effective solutions tailored to your specific operational and regulatory needs.

RADIOLOGICAL SERVICES

Regulatory and licensing support, dosimetry studies, radiation monitor system audits, facility design, and radiation shielding calculations and design.

NEW BUILD & DECOMMISSIONING SUPPORT

Extensive knowledge in the areas of managing and implementing unique and tailored solutions for all phases of a project.

PROFESSIONAL STAFF AUGMENTATION

RP techs, RP supervisors & engineers, ALARA coordinators and specialists, Certified Health Physicists (CHPs), outage staffing, and maintenance services.

TRAINING

AP3 accredited training supports RPMs from foundational instruction in instrumentation, dosimetry, and respiratory protection to professional development for RPM candidates.
