

A legacy of innovation
at its core.

**With technologies
and expertise
to empower the
future of nuclear.**

Curtiss-Wright was formed by the merger of companies founded by Glenn Curtiss, the father of naval aviation, and the Wright brothers, renowned for history's first flight. These technological pioneers ushered in the era of aviation and their trailblazing spirit made history. Their spirit of innovation continues to guide the company's development of advanced solutions for the most challenging applications.

Today, Curtiss-Wright's commercial nuclear power products and technologies help make nuclear plants more **robust**, **efficient**, and **reliable** across the globe.
