

The POWER of Our PLATFORM

Advancing Nuclear Execution

Built for the future of nuclear energy, our integrated platform provides full-spectrum services across outages, routine work, plant modifications, and capital projects to support evolving utility needs.

Our platform delivers:

Maintenance

Solutions that reduce dose, waste, rework, and risk while improving safety and predictability.

Engineering

Validated, licensable designs and nuclear consulting grounded in plant conditions, data, and regulatory requirements.

Staffing

Job-ready technical, professional, and radiation protection talent ready to serve the nuclear industry.

Radiological Services

Radiation safety and health physics expertise supporting operations, outages, license renewal, and decommissioning.

Projects

End-to-end project execution with disciplined controls, digital tools, and supplier oversight to deliver consistent, high-quality results.

From start to success, Allied Power advances your nuclear projects.
