Decontamination, Hydrolasing,
Hydrodemolition & Cold Cutting

COME SEE US AT NECX 2026
BOOTH #326

AKIS Nuclear Waterjetting Advantages

- **Proven Problem Solving:** Alternative methods effective where conventional mechanical tools struggle
- **Experienced Specialty Crews:** Trained and focused exclusively on waterjetting and hydrodemolition
- **Remote Operation Capability:** Reduces worker exposure and improves safety
- **Contamination-Conscious Methods:** Water helps limit airborne particulate generation aligned with ALARA principles
- **Rapid Deployment:** Equipment & personnel available for work throughout North America
- **Cold Cutting Technology:** No sparks, flames, or heat input

DEDICATED WATERJETTING EXPERTISE

Hydrolasing is not a support service at AKIS; it is our core business. From hydrodemolition and decontamination to industrial cleaning and abrasive waterjet cutting, our crews bring specialized knowledge, advanced equipment, and decades of practical experience to every project.
