

WMG Regulatory Training

Practical. Compliant. Proven.

Domestic and international regulations require hazmat employees to complete routine safety, compliance, and functional training. Standards outlined in 49 CFR 172 Subpart H and reinforced across U.S. and separate international regulatory frameworks all agree on one thing: regular training is foundational to safety and compliance. For more than 40 years, WMG Software, Training, and Services has been a trusted provider to the commercial nuclear power and radioactive waste industry.

Expert Instruction

Regulatory Alignment

Practical Application

Our Course Offerings:
