Westinghouse technology is fundamental to nearly 50% of the world's nuclear reactors. Now, that same trusted expertise is delivering the services and parts to meet the needs of 100% of the nuclear plants across the globe.

**From small to large.**
Whether your project involves new construction or existing equipment, for a nuclear plant or a government facility, Westinghouse provides high-quality, nuclear-qualified solutions and products that meet the original design and qualification of your plant.

**Global to local.**
Our cost-effective, high-quality, nuclear-grade replacement parts provide global operators of various reactor designs solutions for electrical, mechanical, and instrumentation and control systems.

**From Westinghouse’s proprietary innovations to designs around the world.**
Westinghouse has a rigorous commercial-grade dedication process and a robust quality assurance program for detecting and monitoring counterfeit, fraudulent and suspect replacement parts and components. And our industry-leading experts are available 24/7 to support your plant needs.
