

TECHNICAL PAPERS

REACTOR SAFETY

- 1 Stability Analyses of the Upgraded BWR Using the Large Assembly with Small Pins Concept / *Kazuaki Kito, Rui Hu, Mujid S. Kazimi*
- 14 PSA-Oriented Analysis of Transients in Atucha Unit II PHWR with a RELAP Model / *J. González, P. Zanocco, M. Giménez, M. Schivo, O. Mazzantini, M. Caputo, G. Bedrossian, P. Serrano, A. Vertullo*

FUEL CYCLE AND MANAGEMENT

- 27 Safety Evaluation of the Upgraded BWR Using the Large Assembly with Small Pins Concept / *Kazuaki Kito, Aydın Karahan, Yasuro Kimura, Pavel Hejzlar, Mujid S. Kazimi*

THERMAL HYDRAULICS

- 38 A Large Assembly with Small Pins Concept for High-Power-Density BWRs / *Aydın Karahan, Jacopo Buongiorno, Mujid S. Kazimi*
- 53 Simulation of Loss of RHRs Sequences in PKL Facility with RELAP5 and Trace Codes / *César Queral, Antonio Expósito, Alberto Concejal, Pablo Niesutta*

RADIOACTIVE WASTE MANAGEMENT AND DISPOSAL

- 74 Temperature, Humidity, and Airflow in the Emplacement Drifts Using Convection and Dispersion Transport Models / *G. Danko, J. Birkholzer, D. Bahrami, N. Halecky*

RADIOISOTOPES

- 88 Modeling of Iodine Radiochemistry in the ASTEC Severe Accident Code: Description and Application to FPT-2 PHEBUS Test / *L. Bosland, L. Cantrel, N. Girault, B. Clement*
- 108 The High-Temperature Chemical Reactivity of Li_2O / *G. F. Kessinger, A. R. Jurgensen, D. M. Missimer, J. S. Morrell*
