

Fusion Science and Technology

CONTENTS / JANUARY 2011—VOL. 59, NO. 1

Selected papers from
NINETEENTH TARGET FABRICATION MEETING
Orlando, Florida, February 21–26, 2010
Guest Editor: Robert C. Cook

v Comments / *Nermin A. Uckan*

vii Preface / *David Harding*

TECHNICAL PAPERS

- 1 NIF Ignition Target Requirements, Margins, and Uncertainties: Status February 2010 / *S. W. Haan, J. D. Salmonson, D. S. Clark, D. D. Ho, B. A. Hammel, D. A. Callahan, C. J. Cerjan, M. J. Edwards, S. P. Hatchett, O. L. Landen, J. D. Lindl, B. J. MacGowan, M. M. Marinak, D. H. Munro, H. F. Robey, B. K. Spears, L. J. Suter, R. P. Town, S. V. Weber, D. C. Wilson*
- 8 CH Capsule Fabrication for Ignition Tuning Campaign / *K. C. Chen, K. A. Moreno, Y. T. Lee, J. J. Wu, A. Q. L. Nguyen, H. Huang, K. Sequoia, A. Nikroo*
- 14 Deuterium-Tritium Fuel Layer Formation for the National Ignition Facility / *B. J. Koziowski, E. R. Mapoles, J. D. Sater, A. A. Chernov, J. D. Moody, J. B. Lugten, M. A. Johnson*
- 26 Metrology Statistics for NIF Tuning Campaign / *H. Huang, R. Fallon, S. W. Haan, Y. T. Lee, K. A. Moreno, A. Q. L. Nguyen, A. Nikroo, K. L. Sequoia, R. B. Stephens, J. J. Wu*
- 35 Increased X-Ray Opacity of GDP Capsules from High Intensity X-Ray Exposure / *K. L. Sequoia, H. Huang, R. B. Stephens, K. A. Moreno, K. C. Chen, A. Nikroo*
- 39 A New Flat-Fielding Technique for X-Ray Radiography of Low-Z Samples Using Xradia MicroXCT Microscope / *H. Huang, R. B. Stephens, S. A. Eddinger*
- 46 Evolution of the Capsule Fill Tube Assembly Production Methods for the National Ignition Campaign / *K. A. Moreno, K. C. Chen, J. W. Crippen, R. Fallon, H. Huang, Y. T. Lee, A. Q. L. Nguyen, A. Nikroo, K. L. Sequoia, J. J. D. Wu, H. W. Xu*
- 51 Modeling and Experiments of Compressible Gas Flow Through Microcapillary Fill Tubes on NIF Targets / *S. Bhandarkar, T. Parham, J. Fair*
- 58 Improvements to Formvar Tent Fabrication Using the Meniscus Coater / *M. Stadermann, S. A. Letts, S. Bhandarkar*
- 63 Quality Assurance and Characterization of Adhesives Used for NIC Target Assembly / *S. A. Letts, S. Bhandarkar, M. Stadermann, J. Birnbaum*

(Continued)

CONTENTS / JANUARY 2011—VOL. 59, NO. 1

(Continued)

- 70** Lessons from Building Laser-Driven Fusion Ignition Targets with the Precision Robotic Assembly Machine / *R. C. Montesanti, E. T. Alger, L. J. Atherton, S. D. Bhandarkar, C. Castro, E. G. Dzenitis, G. J. Edwards, A. V. Hamza, J. L. Klingmann, D. M. Lord, A. Nikroo, T. G. Parham, J. L. Reynolds, R. M. Seugling, M. Stadermann, M. F. Swisher, J. S. Taylor, P. J. Wegner*
- 78** NIF Target Assembly Metrology Methodology and Results / *E. T. Alger, J. Kroll, E. G. Dzenitis, R. Montesanti, J. Hughes, M. Swisher, J. Taylor, K. Segraves, D. M. Lord, J. Reynolds, C. Castro, G. Edwards*
- 87** Germanium Doped CH_x Microshells for LMJ Targets / *C. Chicanne, J. Bray, E. Peche, G. Legay, M. Theobald, O. Legaie, A. Ollagnier, E. Finot*
- 94** The Production and Characterization of Banded GDP Capsules for Defect Implosion Experiments on Omega / *B. A. Vermillion, M. L. Hoppe, Sr., E. L. Alfonso, E. M. Giraldez, M. L. Hoppe, Jr., J. A. Fooks*
- 99** Development in Glass Shells Production from Silicon-Doped GDP for Noncryogenic LMJ Target / *S. Le Tacon, C. Chicanne, M. Theobald, O. Legaie*
- 105** Developments in the Production of Iron Doped and High-Aspect-Ratio SiGDP to Glass Capsules / *M. L. Hoppe, Sr., B. A. Vermillion, K. C. Chen*
- 110** Characterization of the Microshell Surface Using Holography / *C. Hermerel, A. Choux, L. Jeannot, E. Busvelle, P. Merillot, O. Legaie*
- 116** Techniques to Measure the Refractive Index of GDP and Ge-Doped GDP with Monochromatic Light / *E. L. Alfonso, A. A. Clark, D. A. Steinman, R. B. Stephens*
- 121** Further Characterizations of Sputtered Copper Beryllium Capsules Using Confocal Micro X-Ray Fluorescence / *Brian M. Patterson, Kimberly A. Obrey, George J. Havrilla*
- 126** Improving the Reproducibility of the Radial Argon Concentration in Beryllium Shells / *K. Youngblood, C. Alford, S. Bhandarkar, J. Hayes, K. Moreno, A. Nikroo, H. Xu*
- 133** Thick, Multisteped Iron and Tantalum Targets for Equation-of-State Measurements at High Pressures and Low Temperatures / *P. B. Mirkarimi, K. A. Bettencourt, M. C. Kellam, P. J. Davis, N. E. Teslich, J. B. Alameda*
- 139** Deposition of Au-Mo Cocktail Coatings and Gold-Based Thin Layers as Corrosion Protective Barrier by Magnetron Sputtering for Au-DU Hohlräume / *J. Nazon, E. Brun, F. Durut, M. Theobald, O. Legaie*
- 148** Overview on Materials and Technological Developments for the LMJ Cryogenic Target Assembly / *B. Reneaume, G. Allegre, R. Botrel, H. Bourcier, R. Bourdenet, O. Breton, R. Collier, C. Dauteuil, F. Durut, A. Faivre, E. Fleury, I. Geoffray, G. Geoffray, L. Jeannot, L. Jehanno, O. Legaie, G. Legay, S. Meux, G. Paquignon, J. P. Perin, J. Schunk, M. Theobald, C. Vasselin, F. Viargues*
- 155** Four Years of Experimental Results on the Prototypes of the Cryogenic Holders of the Laser Mégajoule Facility / *G. Paquignon, D. Brisset, J. Manzagol*
- 159** Evolution and Progress of the Cryogenic Target Shroud Remover Prototypes Developed for the LMJ Facility / *J. Manzagol, G. Paquignon, D. Brisset, P. Bonnay, E. Bouleau, D. Chatain, M. Chichoux, D. Communal, V. Lamaison, J. P. Perin*

(Continued)

CONTENTS / JANUARY 2011—VOL. 59, NO. 1

(Continued)

- 166** With Regard to the Low Mode Target Lifetime: An Analytical Model / *Michel Martin, Géraldine Moll, François Lallet, Alexandre Choux, Rémy Collier, Olivier Legaie, Laurent Jeannot*
- 171** LMJ Targets for Nuclear Fusion: Recent Experimental and Theoretical Advances on Redistribution Process, Control of Target Temperature, and Effect of D-T Aging / *F. Lallet, C. Gauvin, M. Martin, G. Moll*
- 182** Numerical Simulations of Removing Anticonvection Baffles Inside a Laser Mégajoule Cryotarget / *Géraldine Moll, Michel Martin, Rémy Collier*
- 190** Aerogel Microsphere Density: A Comparison of Gravimetric and X-Ray Absorption Techniques / *L. J. Peacock, C. D. Bentley, N. Bazin, E. Stott, C. MacQueen*
- 194** Incorporation of Tracer Elements Within Aerogels and CH Foams / *Christopher E. Hamilton, Diana Honnell, Brian M. Patterson, Derek W. Schmidt, Kimberly A. DeFriend Obrey*
- 199** Development and Fabrication of NIF-Scale Resorcinol Formaldehyde Foam Shells for ICF Experiments / *R. R. Paguio, D. Jaison, K. M. Saito, K. Quan, J. F. Hund, A. Nikroo*
- 205** TPX Foams for Inertial Fusion Laser Experiments: Foam Preparation, Machining, Characterization, and Discussion of Density Issues / *Marie Grosse, Lyonel Guillot, Benoît Reneaume, Emmanuel Fleury, Cyril Hermerel, Alexandre Choux, Laurent Jeannot, Isabelle Geoffray, Alexis Faivre, Olivier Breton, Johan Andre, Remy Collier, Olivier Legaie*
- 216** Monolithic and Low-Density ($<50 \text{ mg/cm}^3$) Metal Oxides Fabricated Using Electrospinning: Vanadium Oxide and Copper Oxide Examples / *Keiji Nagai, Kohei Miyamoto, Tomokazu Iyoda, Cao Pan, Zhongze Gu*
- 221** An Update of Target Fabrication Techniques for the Mass Production of Advanced Fast Ignition Cone Targets / *C. Spindloe, M. K. Tolley, P. Hiscock, M. Beardsley, J. J. Spencer*
- 227** A Robotic System for High-Throughput-Rate Target Assembly / *G. E. Lee, N. B. Alexander, E. Diaz, J. D. Sheliak*
- 234** Status of the Development of the HiPER Single-Shot Target / *Frédéric Ben Saïd, Benoît Reneaume, Christophe Dauteuil, Olivier Breton, Ronan Botrel, Cédric Chicanne, Isabelle Geoffray, Rémy Collier, Olivier Legaie*
- 240** On-Chip Double Emulsion Droplet Assembly Using Electrowetting-on-Dielectric and Dielectrophoresis / *W. Wang, T. B. Jones, D. R. Harding*
- 250** Target Fabrication at the University of Michigan / *M. J. Grosskopf, D. C. Marion, R. P. Drake, C. C. Kuranz, F. W. Doss, A. J. Visco, C. M. Huntington, C. M. Krauland, C. A. Di Stefano, E. C. Harding*
- 257** Target Fabrication of Opacity Experiments on Z for Weapons Science Applications / *Kimberly A. Defriend Obrey, Manolo Sherrill, David J. Devlin, Robert D. Day, Derek W. Schmidt, Brent F. Espinoza, Kevin M. Hubbard, Adelaida C. Valdez, Mcllwaine Archer, Deanna Capelli, Franklin Fierro, Randall B. Randolph*

(Continued)

CONTENTS / JANUARY 2011—VOL. 59, NO. 1

(Continued)

- 262** Laser Entrance Hole Window Burst and Pressure Deflections at Cryogenic Temperature / *Bruce Lairson, Ryan Smith, Jeff Guckian, Travis Ayers, Suhas Bhandarkar*
- 267** Fabrication of Backlighter Laser Targets via Lithography / *J. F. Hund, J. S. Jaquez, C. Deck, K. Quan*
- 271** Improvements to Fill Tube Design for Direct-Drive NIF and Fast Ignition Applications / *K. M. Saito, J. F. Hund, M. Wittman, A. Nikroo, J. W. Crippen, J. S. Jaquez, E. M. Giraldez*
- 276** Recent Developments in Fabrication of New Conceptual Gold Cone and Machining of Polystyrene Shell for Fast Ignition Target / *H. Homma, H. Kadota, H. Hosokawa, M. Nagata, T. Fujimura, K. Nagai, M. Nakai, T. Norimatsu, H. Azechi*
