

NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 169, NUMBER 1, SEPTEMBER 2011

CONTENTS

TECHNICAL PAPERS

- | | | |
|----|--|--|
| 1 | Cell Homogenization Method for Pin-by-Pin Neutron Transport Calculations | <i>Tomasz Kozłowski, Yunlin Xu,
Thomas J. Downar, Deokjung Lee</i> |
| 19 | Application of the Chord Method to Obtain Analytical Expressions for Dancoff Factors in Stochastic Media | <i>Wei Ji, William R. Martin</i> |
| 40 | Many-Group Cross-Section Adjustment Techniques for Boiling Water Reactor Adaptive Simulation | <i>M. A. Jessee, P. J. Turinsky,
H. S. Abdel-Khalik</i> |
| 56 | The Simulation of Probability Distribution of the Burst Waiting Time of Neutron Initiation | <i>Xiao Gang</i> |
| 68 | How to Randomly Evaluate Nuclear Data: A New Data Adjustment Method Applied to ^{239}Pu | <i>D. Rochman, A. J. Koning</i> |

TECHNICAL NOTES

- | | | |
|----|--|-----------------------------------|
| 81 | High-Order Diamond Differencing Along Finite Characteristics | <i>Alain Hébert</i> |
| 98 | Feynman-Alpha and Rossi-Alpha Formulas with Delayed Neutrons for Subcritical Reactors Driven by Pulsed Non-Poisson Sources with Correlation Between Different Pulses | <i>Y. S. Rana, S. B. Degweker</i> |
