

NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 89, NUMBER 3, MARCH 1985

CONTENTS

TECHNICAL PAPERS

- 197 Effects of Virtual Mass on the Mathematical Characteristics and Numerical Stability of the Two-Fluid Model *H. C. No, M. S. Kazimi*
- 207 Scaling Criteria for Nuclear Reactor Thermal Hydraulics *Robert L. Kiang*
- 217 Effective Buckling Method for Reliable Criticality Calculation of Small Nuclear Systems by Two-Dimensional Diffusion Codes *Yigal S. Gur, Yair Bartal, Shimon Yiftah*
- 233 Monte Carlo Calculations of the Bremsstrahlung Radiation Environment Expected in the Future Particle Beam Fusion Accelerator Facility PBFA II *M. A. Sweeney, J. N. Olsen*
- 247 Hadronic Event Generation for Hadron Cascade Calculations and Detector Simulation—Part III: Application of the Model to Hadron Cascade Calculations *H. J. Möhring, J. Ranft*
- 256 Exact Time-Dependent Moments for the Monoenergetic Neutron Transport Equation with Isotropic Scattering *B. D. Ganapol*
- 261 An Absolute Measurement of the ${}^7\text{Li}(n,n'\alpha t)$ Reaction Cross Section Between 5 and 14 MeV by Tritium Assaying *M. T. Swinhoe, C. A. Uttley*

TECHNICAL NOTES

- 273 A Neutron Buildup Determination and Its Properties *D. R. Wyman, A. A. Harms*
- 280 Statistical Estimates of Thermal Neutron Capture Cross Sections *Yu. V. Petrov, A. I. Shlyakhter*
- 281 An Efficient Algorithm for Nodal-Transport Solutions in Multidimensional Geometry *Ahmed Badruzzaman*

BOOK REVIEW

- 291 The Independent Nuclear State: The United States, Britain and the Military Atom, John Simpson *Bernard I. Spinrad*
