

NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 85, NUMBER 4, DECEMBER 1983

CONTENTS

TECHNICAL PAPERS

- 325 Neutron Signal Multiplet Analysis for the Mass Determination of Spontaneous Fission Isotopes *R. Dierckx, W. Hage*
- 339 Evaluation of the Yields from the Radiolysis of Water in Boiling Water Reactors by Neutron and Gamma Radiation *Eishi Ibe, Shunsuke Uchida*
- 350 Neutron Capture Cross Sections and Resonances of Iodine-127 and Iodine-129 *R. L. Macklin*
- 362 Neutron Noise Transmission Characteristics of Multiplying Media and Neutron Noise Source Localization in Liquid-Metal Fast Breeder Reactors by Using the Neutron Wave Propagation Technique *T. M. John, Om Pal Singh*
- 371 Comparison of Measured and Calculated Radiation Transport in Air-Over-Ground Geometry to 1.6 km from a Fission Source *A. H. Kazi, C. R. Heimbach, R. C. Harrison, H. A. Robitaille*
- 387 Mixing of Molten Core Material and Water *S. G. Bankoff, S. H. Han*
- 396 Real-Time Simulation of the Transient Behavior of Local and Global Pressurized Water Reactor Core and Plant Parameters *A. Hoeld, O. Lupas*

TECHNICAL NOTES

- 418 Significant Differences in Reported Gamma-Ray Buildup Factors *A. Natarajan, K. V. Subbaiah, D. V. Gopinath*
- 422 Exploitation of Bragg Cutoff Phenomenon for Improved Albedo in Beryllium-Reflected Minimum Critical Mass Systems *P. K. Job, M. Srinivasan*
- 426 A Simple Semi-Empirical Formula for the Incoherent Scattering Cross Sections for Gamma Rays in the 300- to 1250-keV Energy Region *T. K. Umesh, C. Ranganathaiah, B. Sanjeevaiah*
- 427 An Evaluation of Two Aggregates for Use in a Concrete Reactor Shield *F. U. Ahmed, M. A. Rahman, S. R. Husain, M. M. Rahman*

CONTENTS

(Continued)

BOOK REVIEW

- 431** Nuclear Power Materials and Applications, Benjamin M. Ma *P. F. Pasqua*

LETTERS TO THE EDITOR

- 432** Generalized Perturbation Formula Versus Classic Perturbation Formula *J. V. Muralidhar Rao*
- 433** Reply to "Generalized Perturbation Formula Versus Classic Perturbation Formula" *G. C. Pomraning*

- 434** **ANNOUNCEMENT OF CURRENT PUBLICATIONS**
