

Corrigendum

D. F. MONTAGUE and J. B. FUSSELL, "A Methodology for Calculating the Expected Number of Failures of a System Undergoing a Phased Mission," *Nucl. Sci. Eng.*, **74**, 199 (1980).

On p. 200 of the above paper, left column, the definition of "TOP" is erroneously limited to a transient overpower event. In the context of this paper TOP refers to the system failure being investigated. This constraint crept in during preparation of the manuscript for printing and its presence persisted. *Nuclear Science and Engineering* apologizes for any embarrassment the error may have caused.
