

COMMENTS ABOUT BOOK REVIEWS FOR *NUCLEAR TECHNOLOGY/FUSION*

Your willingness to prepare a book review for *Nuclear Technology/Fusion (NT/F)* is appreciated and provides an important service to other readers of *NT/F*. While there is no set length for these reviews, they should be concise, typically running one to two journal pages (three to six typewritten pages).

Your review should identify the “audience” that the book will serve and indicate your evaluation of the potential for success in communicating with that audience. *NT/F* readers are also obviously interested in the topical coverage, use of references, problem sets (for texts), and any unusual features of the book. Some reviewers like to compare the book under review with others that have similar coverage in order to bring out differences and unique features. Originality, technical accuracy, and organization are also important aspects to point out in the review. In conclusion, you are invited to state whether or not you recommend purchase of the book by *all NT/F* readers or, alternately, by a select group of readers (e.g., students, persons interested in research, etc.).
