

NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 116, NUMBER 1, JANUARY 1994

CONTENTS

TECHNICAL PAPERS

- 1** A Global Physics Approach to Transmutation of Radioactive Nuclei *M. Salvatores, I. Slessarev, M. Uematsu*
- 19** Measurement of Radioactivity Production for ^{48}V , ^{56}Co , and ^{65}Zn Via the (p, n) Sequential Reaction Processes in Titanium, Iron, and Copper Metals Associated with 14-MeV Neutron Irradiation *Y. Ikeda, C. Konno, H. Maekawa*
- 28** Measurement of Neutron Activation Cross Sections for the $^{99}\text{Tc}(n, p)^{99}\text{Mo}$, $^{99}\text{Tc}(n, \alpha)^{96}\text{Nb}$, $^{99}\text{Tc}(n, n'\alpha)^{95}\text{Nb}$, and $^{99}\text{Tc}(n, n')^{99m}\text{Tc}$ Reactions at 13.5 and 14.8 MeV *Y. Ikeda, E. T. Cheng, C. Konno, H. Maekawa*
- 35** A Method for Calculating Double-Differential Cross Sections of Alpha-Particle Emissions *Jingshang Zhang*
- 42** Solution of the Mathematical Adjoint Equations for an Interface Current Nodal Formulation *W. S. Yang, T. A. Taiwo, H. Khalil*

TECHNICAL NOTES

- 55** An Investigation of the Temporal Subdomain Method for Solving the Finite Element Formulation of the Space-Time Reactor Kinetics Equations *Haluk Utku, John M. Christenson*
- 67** The Reactor Noise Threshold *Gregory D. Spriggs*
