

NUCLEAR SCIENCE AND ENGINEERING

VOLUME 53, NUMBER 2, FEBRUARY 1974

CONTENTS

TECHNICAL PAPERS

- 123 The Continued Fraction Approximation: A Time-Dependent Transport Method *William A. Yingling, Charles J. Bridgman*
- 137 Exact Time-Dependent Spatial and Legendre Moments for the Monoenergetic Transport Equation *E. H. Canfield*
- 141 An Analytical Estimate of the Error in Conventional Point-Kinetics Reactivity Due to Spatial Effects *George E. Apostolakis*
- 153 Neutron Slowing Down via Inelastic Scattering in Heavy Moderators—I. Steady State *Michael J. Lineberry, Noel Corngold*
- 162 Gamma-Ray Heating Measurements in Zero-Power Fast Reactors with Thermoluminescent Dosimeters *G. G. Simons, T. J. Yule*
- 176 Analyses and Measurements of Gamma-Ray Heating in the Demonstration Benchmark Plutonium-Fueled Critical Assembly *G. G. Simons, A. P. Olson*
- 197 Moments Method Calculations of Neutron Distributions in Concrete *G. L. Simmons, C. Eisenhauer*
- 220 Early Time Air Fireball Model for Near Surface Energy Release *G. C. Pomraning*
- 226 An Algorithm for the Energy Deposition by Fast Electrons *Tatsuo Tabata, Rinsuke Ito*
- 240 Pool Boiling in Subcooled Sodium at Atmospheric Pressure *M.M.K. Farahat, Donald T. Eggen, Donn R. Armstrong*

TECHNICAL NOTES

- 255 A New Form of the B_N Transport Equations *J. Ligou, J. Stepanek*
- 256 Angle Selection Techniques for Gamma Photons in Monte Carlo Calculations on Parallel Computers *G. P. Cavanaugh, A. B. Chilton*
- 261 Deposition of Energy in U, UC, and UO₂ Fuels *K. B. Winterbon*
