## CONTENTS

(Continued)

- 467 Neutron Spectral Analysis of the Caorso Boiling Water Reactor Cavity and Sacrificial Shield Penetrations and Comparison with the Irradiation Experiment Results  
*P. Barbucci, G. Mariotti, N. Cerullo, P. Riscossa, A. Cesana, M. Terrani, G. Sandrelli*
- 479 Intercomparison of Reaction Rate and Gamma Scan Measurements and Calculation Analyses in a Pressurized Water Reactor  
*B. M. Rothleder*
- 490 The Superphénix-2 Project  
*J. P. Marcon, H. Sztark*
- 496 Experimental Study of the Large-Scale Axially Heterogeneous Liquid-Metal Fast Breeder Reactor at the Fast Critical Assembly—Power Distribution Measurements and Their Analyses  
*Susumu Iijima, Makoto Ōbu, Tamotsu Hayase, Akio Ohno, Tatsuo Nemoto, Shigeaki Okajima*
- 507 The Integral Fast Reactor Concept: Physics of Operation and Safety  
*D. C. Wade, Y. I. Chang*
- 525 Analyses of Reactor Physics Experiments in the Kyoto University Critical Assembly  
*Seiji Shiroya, Keiji Kanda, Keichiro Tsuchihashi*
- 538 Analysis of Large Liquid-Metal Fast Breeder Reactor Critical Experiments by Improved Methods  
*Toshikazu Takeda, Hironobu Unesaki, Tamotsu Sekiya, Keisho Shirakata*
- 549 Results and Implications of the Experimental Breeder Reactor II Inherent Safety Demonstration Tests  
*H. P. Planchon, G. H. Golden, J. I. Sackett, D. Mohr, L. K. Chang, E. E. Feldman, P. R. Betten*

### COMPUTER CODE ABSTRACT

- 558 Liquid-Metal-Cooled Reactor Thermal-Hydraulic Calculations in the United States  
*F. E. Dunn, D. J. Malloy, D. Mohr*

- 564 **VOLUME 100 AUTHOR AND SUBJECT INDEXES**
