

# NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 101, NUMBER 1, JANUARY 1989

## CONTENTS

### TECHNICAL PAPERS

- 1 Interaction of Neutrons with  $^9\text{Be}$  at 14.6 MeV—The Four-Body Breakup  $2n + 2\alpha$  *D. Ferenc, B. Antolković, G. Paić, M. Zadro, S. Blagus*
- 8 Determination of the Field of View of a Boiling Water Reactor In-Core Detector *Alireza Haghghat, George Kosály*
- 26 Vapor Pressure Measurements on Liquid Uranium Oxide and (U,Pu) Mixed Oxide *W. Breitung, K. O. Reil*
- 41 On the Reactivity Effects of Nuclear Fuel Fragmentation with Reference to the Chernobyl Accident *Markku Rajamäki, Frej Wasastjerna*
- 48 One-Dimensional Transient Fluid Model for Fuel/Coolant Interaction Analysis *C. C. Chu, M. L. Corradini*
- 72 A Hybrid Collocation-Galerkin- $S_n$  Method for Solving the Boltzmann Transport Equation *J. E. Morel*

### TECHNICAL NOTE

- 88 Evaluation of Correlated Data Using Partitioned Least Squares: A Minimum-Variance Derivation *D. W. Muir*

### LETTERS TO THE EDITOR

- 94 Comparison of the Response to Small Perturbations in Metal- and Oxide-Fueled Liquid-Metal-Cooled Reactors *Suresh M. Lee*
- 95 Response to "Comparison of the Response to Small Perturbations in Metal- and Oxide-Fueled Liquid-Metal-Cooled Reactors" *K. O. Ott*
