

# NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 111, NUMBER 3, JULY 1992

## CONTENTS

### TECHNICAL PAPERS

- 215** A Comparison of Models for Particle Transport Through Stochastic Mixtures *F. Malvagi, G. C. Pomraning*
- 229** Probabilistic Reactor Dynamics—I: The Theory of Continuous Event Trees *J. Devooght, C. Smidts*
- 241** Probabilistic Reactor Dynamics—II: A Monte Carlo Study of a Fast Reactor Transient *C. Smidts, J. Devooght*
- 257** Analysis of Cluster Geometries Using the DP1 Approximation of the  $J_{\pm}$  Technique *G. Marleau, A. Hébert*
- 271** Applied Resonance Equivalence *M. Segev*
- 279** Stability Improvement of the Alternating Direction Implicit Method for Two-Dimensional Space-Time Reactor Kinetics Applications *Gen-Shun Chen, John M. Christenson, Dow-Yung Yang*
- 294** Gain-Scheduled Nonlinear Control of U-Tube Steam Generator Water Level *Sunil K. Menon, Alexander G. Parlos*
- 309** Small-Angle Scattering Cross Sections of 14.8-MeV Neutrons for Iron, Nickel, and Chromium *Huiquan Qi, Hongbin Chen, Yingtang Chen, Qiankun Chen, Zhenpeng Chen, Zemin Chen*
- 314** Cross-Section Measurement for  $^{109}\text{Ag}(n,2n)^{108m}\text{Ag}$  Reaction *Yongchang Wang, Junqian Yuan, Jingkang Yang, Huamin Wang, Yongqing Shui, Zhongliang Ren*

### COMPUTER CODE ABSTRACT

- 317** CMUP2—A Program for Calculating Complex Reactions of a Medium-Heavy Nucleus with Charged Particles *Chonghai Cai, Qingbiao Shen*
