

# NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 120, NUMBER 3, JULY 1995

## CONTENTS

### TECHNICAL PAPERS

- 147** A Diffusion-Synthetic Acceleration Technique for the Even-Parity  $S_n$  Equations with Anisotropic Scattering *J. E. Morel, J. M. McGhee*
- 165** Exponential Characteristic Spatial Quadrature for Discrete Ordinates Radiation Transport with Rectangular Cells *Bryan Minor, Kirk Mathews*
- 187** Anisotropic Scattering Treatment for the Neutron Transport Equation with Primal Finite Elements *B. Akherraz, C. Fedon-Magnaud, J. J. Lautard, R. Sanchez*
- 199** Effects of Linear Polarization and Doppler Broadening on the Exposure Buildup Factors of Low-Energy Gamma Rays *Y. Namito, S. Ban, H. Hirayama*
- 211** Approximating Model for Multilayer Gamma-Ray Buildup Factors by Transmission Matrix Method: Application to Point Isotropic Source Geometry *Kazuo Shin, Hideo Hirayama*
- 223** Neutron Temperature Measurements in a Cryogenic Hydrogenous Moderator *Russell M. Ball, Gary S. Hoover, Robert H. Lewis*

### LETTER TO THE EDITOR

- 231** On Murray's Reactor Kinetics Insight *Jeffery Lewins*
- 232** **VOLUME 120 AUTHOR AND SUBJECT INDEXES**
