

NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 123, NUMBER 1, MAY 1996

CONTENTS

TECHNICAL PAPERS

- 1 Calculation and Evaluation of Cross Sections and Kerma Factors for Neutrons up to 100 MeV on ^{16}O and ^{14}N *M. B. Chadwick, P. G. Young*
- 17 Calculation and Evaluation of Cross Sections and Kerma Factors for Neutrons up to 100 MeV on Carbon *M. B. Chadwick, L. J. Cox, P. G. Young, A. S. Meigooni*
- 38 The Even-Parity and Simplified Even-Parity Transport Equations in Two-Dimensional x-y Geometry *Taewan Noh, Warren F. Miller, Jr., Jim E. Morel*
- 57 A Locally Exact Numerical Scheme with Nonoscillation Properties for Stationary Transport Equations with Absorption and Source Terms *Katsuhiko Sakai*
- 68 Singular Perturbation Solutions of the Neutron Transport Equation *David C. Losey, John C. Lee, William R. Martin, Thomas C. Adamson, Jr.*
- 86 The FLEXBURN Neutron Transport Code Developed by the S_n Method with Transmission Probabilities in Arbitrary Square Meshes for Light Water Reactor Fuel Assemblies *Takanori Kameyama, Tetsuo Matsumura, Makoto Sasaki*
- 96 Continuous Energy Monte Carlo Calculations of Randomly Distributed Spherical Fuels in High-Temperature Gas-Cooled Reactors Based on a Statistical Geometry Model *Isao Murata, Takamasa Mori, Masayuki Nakagawa*
- 110 The Two-Region Milne Problem *B. D. Ganapol, G. C. Pomraning*
- 121 The Effective Fuel Temperature to be Used for Calculating Resonance Absorption in a $^{238}\text{UO}_2$ Lump with a Nonuniform Temperature Profile *W. J. M. de Kruijf, A. J. Janssen*
- 136 The Effect of Gas Injection Configuration on Two-Phase Countercurrent Flow Limitation in Short Vertical Channels *S. M. Ghiaasiaan, J. D. Bohner, S. I. Abdel-Khalik*
