

NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 113, NUMBER 3, MARCH 1993

CONTENTS

TECHNICAL PAPERS

- 189** Transient Gas Motion in Nuclear-Reactor-Pumped Lasers: Computational and Experimental Results *J. R. Torczynski, D. R. Neal*
- 207** Solubility of Nickel and Cobalt Oxides in High-Temperature Water *Kostadin Dinov, Chihiro Matsuura, Daisuke Hiroishi, Kenkichi Ishigure*
- 217** Thermal and Epithermal Sensitivities of Cobalt Self-Powered Neutron Detectors *Maria do Carmo Lopes, Jorge Molina Ávila*
- 227** A Consistent Technique for the Pin-by-Pin Homogenization of a Pressurized Water Reactor Assembly *A. Hébert*
- 239** Criticality Analysis of Heterogeneous Light Water Reactor Configurations *S. Sitaraman, F. Rahnema*
- 251** Stability Analysis of a Linear Reactor System with Feedback Under Low-Flow, Low-Power Conditions *E. V. Depiante*
- 264** An Efficient Computational Technique for Thermal Reactor Transients *B. O. Cho, A. H. Robinson*

TECHNICAL NOTES

- 271** Application of Galerkin's Method to Calculate the Behavior of Boiling Water Reactors During Limit-Cycle Oscillations *B. Damiano, J. A. March-Leuba, J. A. Euler*
- 282** A Practical Algorithm to Derive the (α, n) Source Term in a Composite Mixture Containing Actinides *Ian R. Terry*
