

AMERICAN NUCLEAR SOCIETY GUIDELINES FOR ELECTRONIC MANUSCRIPT PREPARATION

If your paper was typed on a personal computer using an IBM-compatible operating system (MS-DOS, PC-DOS, DOS), you can help ANS reduce the possibility of errors and keep expenses to a minimum by providing us with a corrected copy of the disk. The disk will be used to set type rather than having the text retyped by the typesetter.

After you consider the reviewer comments and have made the corrections to your paper, it would help greatly if you would make an extra copy of the corrected disk and send it with the typed copy of the revised paper. *It is essential that you send a typed copy of the final draft in addition to the disk so that we can ensure accurate conversion of your disk to our system.*

The disk label should include author, title, journal, word processing format, and operating system. ANS can only accept 3½- or 5¼-in. floppy disks in languages that can be stored to ASCII. ANS Headquarters uses WordPerfect Version 5.0.

Before submitting the disk to ANS, please adhere to the following guidelines as the paper is being typed:

1. Be consistent. If you use tabs to indent paragraphs, do not switch to space bars. Consistently use automatic word wrap (soft returns) for sentences within a paragraph and the enter or return key (hard return) at the end of a paragraph.
2. Use the figure 1 not the lower case "ell" for the number one.
3. Use the figure 0 not the capital "oh" for zero.
4. *Use double-spacing consistently throughout the manuscript.*
5. Avoid hyphenating words at the end of a line. Instead, drop the entire word to the next line.
6. If you use the word processor's features for centering, underlining, or indenting, make sure your use of these features is the same throughout the manuscript.
7. Do not use your word processor's automatic footnote capability. Place footnotes at the end of the document as opposed to within the text of the document.

Your cooperation in this process is very much appreciated. Should you have any questions regarding the preparation of your paper, please call the ANS Headquarters Publications Department at 312/352-6611.
