

# NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 68, NUMBER 3, DECEMBER 1978

## CONTENTS

### TECHNICAL PAPERS

- |                        |  |  |
|------------------------|--|--|
| 243                    | The One-Group Neutron Transport Equation and Angular Flux Separability                                   | <i>D. Shalitin, J. J. Wagschal,<br/>Y. Yeivin</i>                |
| 249                    | Analytic Method for the Numerical Solution of the Integral Transport Equation for a Homogeneous Cylinder | <i>Michael S. Milgram</i>  |
| 270                    | Statistical Model Analysis of Spin Influence on the De-excitation of Fission Fragments                   | <i>D. P. Min, M. Martinot</i>                                    |
| 281                    | Detailed Calculations in Energy and Space of Effective Neutron Resonance Cross Sections                  | <i>José M. Aragonés</i>  |
| 299                    | The Impact of Aging Mechanisms on Reactor Safety System Performance                                      | <i>E. Oelkers, W. W. Weaver</i>                                  |
| 308                    | The Role of Rayleigh-Taylor Instabilities in Fuel-Coolant Interactions                                   | <i>Fred Cooper, John Dienes</i>                                  |
| 322                    | Sensitivity Theory for Reactor Thermal-Hydraulics Problems   | <i>E. M. Oblow</i>   |
| 338                    | Multidimensional Effects in Critical Two-Phase Flow  | <i>J. R. Travis, C. W. Hirt,<br/>W. C. Rivard</i>                |
| <br>                   |  |  |
| <b>TECHNICAL NOTES</b> |  |  |
| 349                    | Possible Criticality of Protactinium-231   | <i>George C. Wu, Lawrence Ruby</i>                               |
| 351                    | A Direct Technique for Unfolding Neutron Spectra from Activation Data                                    | <i>Hiroshi Sekimoto</i>  |
| 356                    | Effects of Nuclear Deformation on Neutron Total Cross Sections   | <i>L. Zuffi</i>  |
| 358                    | Measurements of the Total Neutron Cross Section of Uranium-233 Between 40 keV and 4.5 MeV                | <i>W. P. Poenitz, J. F. Whalen,<br/>P. Guenther, A. B. Smith</i> |
| 360                    | The Fission Cross Sections of Plutonium-239 and Plutonium-242 Relative to Uranium-235 from 0.1 to 10 MeV | <i>J. W. Meadows</i>   |
| 363                    | Best-Estimate Fuel Rod Modeling Techniques   | <i>D. A. Niebruegge,<br/>E. L. Tolman, C. W. Solbrig</i>         |

## **CONTENTS**

**(Continued)**

### **BOOK REVIEWS**

- 369** Annual Review of Nuclear Science, Vol. 27  
*W. Bennett Lewis,  
William R. Conkie,  
W. McLatchie,  
B. C. Robertson,  
John C. Hardy, F. C. Khanna*
- 371** Flow Induced Vibration, R. D. Blevins  
*D. J. Gorman*
- 373** ANNOUNCEMENT OF CURRENT PUBLICATIONS
- 377** VOLUME 68 AUTHOR AND SUBJECT INDEXES
