

# NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 91, NUMBER 2, OCTOBER 1985

## CONTENTS

### TECHNICAL PAPERS

- 123 On the Reconstruction of Local Homogeneous Neutron Flux and Current Distributions of Light Water Reactors from Nodal Schemes *K. Koebke, L. Hetzelt*
- 132 Variational Nodal Methods for Neutron Transport *I. Dilber, E. E. Lewis*
- 143 Analysis of the Amplification of Deuterium-Tritium Neutron Sources: Part 1—Theory *M. Segev*
- 153 Analysis of the Amplification of Deuterium-Tritium Neutron Sources: Part 2—Application *M. Segev, S. Taczanowski*
- 162 Determination of Excitation Function of Triton Emission Reaction on Aluminum from Threshold up to 30 MeV via Activation in Diverse Neutron Fields and Unfolding Code Calculations *R. Wölfle, S. Sudár, S. M. Qaim*
- 173 Measurements of  ${}^6\text{Li}$  and  ${}^7\text{Li}$  Neutron-Induced Tritium Production Cross Sections at 15 MeV *Eugene Goldberg, Ronald L. Barber, Patrick E. Barry, Norman A. Bonner, James E. Fontanilla, Clyde M. Griffith, Robert C. Haight, David R. Nethaway, George B. Hudson*
- 187 Cross Sections, Transition Schemes, and Branching Ratios for  ${}^{232}\text{Th}$  from the  ${}^{232}\text{Th}(n,n'\gamma)$  Reaction *J. H. Dave, J. J. Egan, G. P. Couchell, G. H. R. Kegel, A. Mittler, D. J. Pullen, W. A. Schier, E. Sheldon*
- 209 Comprehensive Analysis of Two  ${}^{91}\text{Zr}$  Neutron Transmission Measurements *C. Coceva, P. Giacobbe, M. Magnani*

### TECHNICAL NOTES

- 220 Medians and Means in Probabilistic Risk Assessments *H. W. Lewis*
- 223 Multiple-Collision Solutions for Time-Dependent Neutron Transport in Slabs of Finite Thickness *P. F. Windhofer, N. Pucker*
