

NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 97, NUMBER 2, OCTOBER 1987

CONTENTS

TECHNICAL PAPERS

- | | | |
|------------|--|--|
| 89 | Core Physics Tests of Thorium High-Temperature Reactor Pebble-Bed Core at Zero Power | <i>S. Brandes, H. Daoud,
U. Schmid, V. Drüke</i> |
| 96 | Adaptation of the Inverse Kinetic Method to Reactivity Measurements in the Thorium High-Temperature Reactor-300 | <i>W. Scherer, V. Drüke,
H. Gerwin, W. Presser</i> |
| 104 | Physics Testing at Fort St. Vrain—A Review | <i>J. R. Brown, R. Hackney,
V. Malakhof, W. A. Simon</i> |
| 123 | Experimental Verification of Calculated Neutron Streaming in the Bottom Reflector and Core Support Regions of a Large-Scale High-Temperature Gas-Cooled Reactor Design Concept | <i>C. O. Slater,
F. J. Muckenthaler,
D. T. Ingersoll</i> |
| 145 | Reactor Physics Research Activities Related to the Very High Temperature Reactor in Japan | <i>Yoshihiko Kaneko</i> |
| 161 | Calculation of Effective Plutonium Cross Sections and Check Against the Oscillation Experiment CESAR-II | <i>H. Schaal, W. Bernnat</i> |
