

NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 58, NUMBER 2, OCTOBER 1975

CONTENTS

CRITICAL REVIEW

- 107 The Technological Requirements for Power by Fusion *D. Steiner*

TECHNICAL PAPERS

- 166 High-Order Response Matrix Equations in Two-Dimensional Geometry *Zbigniew Weiss, Sten-Örjan Lindahl*
- 182 A Leakage Iterative Method for Solving the Three-Dimensional Neutron Diffusion Equation *Y. Naito, M. Maekawa, K. Shibuya*
- 193 A Numerical Method for Solving Integral Equations of Neutron Transport—II *Sudarshan K. Loyalka, Robert W. Tsai*
- 203 A Two-Dimensional Finite Element Method for Integral Neutron Transport Calculations *E. E. Lewis, W. F. Miller, Jr., T. P. Henry*
- 213 The Resonance Integral of Coated Particles *Keiichiro Tsuchihashi, Yorio Gotoh*
- 226 Measurement of the Neutron and Gamma-Ray Spectra Originating from a 14-MeV Neutron Source in Liquid Nitrogen and Liquid Air *B. Bröcker, K. Clausen, P. Schneider-Kühnle, M. Weinert*
- 239 The Transport of Radioactive Corrosion Products in High-Temperature Water—I. Recirculating Loop Experiments *D. H. Lister*

TECHNICAL NOTES

- 252 First-Flight Escape Probability for a Three-Region Spherical Body *M. M. R. Williams*
- 253 On the Critical Reactor Problem for a Reflected Slab *C. E. Siewert, A. R. Burkart*
- 255 The Ratio of the Uranium-238 to Uranium-235 Fission Cross Sections from 5.3 to 10.3 MeV *J. W. Meadows*
