

# NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 115, NUMBER 2, OCTOBER 1993

## CONTENTS

### TECHNICAL PAPERS

- |            |   |  |
|------------|---|--|
| <b>89</b>  | Scaling of Complex Phenomena in System Thermal Hydraulics   | <i>R. Bovalini, F. D'Auria,<br/>G. M. Galassi</i>                                    |
| <b>112</b> | Consistent $B_n$ Theory for Slab Lattices   | <i>R. Roy, A. Hébert,<br/>G. Marleau</i>   |
| <b>129</b> | Development of a Third-Generation <i>Superhomogénéisation</i> Method for the Homogenization of a Pressurized Water Reactor Assembly | <i>A. Hébert, G. Mathonnière</i>   |
| <b>142</b> | Application of $H_\infty$ Control Theory to Power Control of a Nonlinear Reactor Model  | <i>Katsuo Suzuki,<br/>Junya Shimazaki,<br/>Yoshikuni Shinohara</i>                   |
| <b>152</b> | Optimal Fuel Loading Pattern Design Using an Artificial Neural Network and a Fuzzy Rule-Based System                                | <i>Han Gon Kim,<br/>Soon Heung Chang,<br/>Byung Ho Lee</i>                           |
| <b>164</b> | Normalization and Minimum Values of the $^{239}\text{Pu}$ Fission Cross Section   | <i>L. W. Weston, J. H. Todd,<br/>H. Derrien</i>                                      |
| <b>173</b> | Normalization of the $^{239}\text{Pu}$ Fission Cross Section  | <i>C. Wagemans,<br/>P. Van Uffelen, A. Deruytter,<br/>R. Barthélémy, J. Van Gils</i> |

### TECHNICAL NOTE

- |            |  |                  |
|------------|--|------------------|
| <b>177</b> | A Collision Probability Analysis of the Double-Heterogeneity Problem | <i>A. Hébert</i> |
|------------|--|------------------|
