

# NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 117, NUMBER 3, JULY 1994

## CONTENTS

### TECHNICAL PAPERS

- |     |  |   |
|-----|--|---|
| 141 | Accounting for the Thermal Neutron Flux Depression in Voluminous Samples for Instrumental Neutron Activation Analysis      | <i>R. M. W. Overwater,<br/>J. E. Hoogenboom</i>           |
| 158 | KENO-NR: A Monte Carlo Code for Simulating $^{252}\text{Cf}$ -Source-Driven Noise Measurements to Determine Subcriticality | <i>Edward P. Ficaró,<br/>David K. Wehe</i>                |
| 177 | Robust Wide-Range Control of Nuclear Reactors by Using the Feedforward-Feedback Concept                                    | <i>Chen-Kuo Weng,<br/>Robert M. Edwards,<br/>Asok Ray</i> |
| 186 | Reactivity Surveillance in a Nuclear Reactor by Using a Layered Artificial Neural Network                                  | <i>A. John Arul</i>                                       |
| 194 | Fault Diagnosis Via Neural Networks: The Boltzmann Machine   | <i>M. Marseguerra, E. Zio</i>                             |
