

# Fusion Technology™

CONTENTS / MARCH 1991 -VOL. 19, NO. 2

## TECHNICAL PAPERS

### ALPHA PARTICLES IN FUSION RESEARCH

- 207 Possibilities of Alpha-Particle Diagnostics in Future Tokamaks Using Helium and Lithium Beam Injection / *N. N. Gorelenkov, A. V. Krasilnikov*

### PLASMA ENGINEERING

- 217 Equilibrium, Stability, and Deeply Trapped Energetic Particle Confinement Calculations for  $l = 2$  Torsatron/Heliotron Configurations / *Yuji Nakamura, Masahiro Wakatani, Jean-Noel Leboeuf, B. A. Carreras, N. Dominguez, Jeff A. Holmes, V. E. Lynch, S. L. Painter, Luis Garcia*
- 234 Saddle Point Condition for D-<sup>3</sup>He Tokamak Fusion Reactor / *Osamu Mitarai, Akira Hirose, Harvey M. Skarsgard*

### FUSION REACTORS

- 251 Projections for a Steady-State Tokamak Reactor Based on the International Thermonuclear Experimental Reactor / *R. Stephen Devoto, William L. Barr, Richard H. Bulmer, Robert B. Campbell, Max E. Fenstermacher, Joseph D. Lee, B. Grant Logan, John R. Miller, Louis L. Reginato, R. A. Krakowski, Ronald L. Miller, Oscar A. Anderson, W. S. Cooper, Joel H. Schultz, James J. Yugo, Joel H. Fink, Yousry Gohar*
- 273 Some Physics Considerations of Magnetic Inertial-Electrostatic Confinement: A New Concept for Spherical Converging-Flow Fusion / *Robert W. Bussard*

### SAFETY/ENVIRONMENTAL ASPECTS

- 294 Impurity Concentration Limits and Activation in Fusion Reactor Structural Materials / *Massimo Zucchetti*

### BLANKET ENGINEERING

- 304 <sup>233</sup>U Production Rate Measurement in a Thorium Oxide Assembly at the LOTUS Facility / *Pierre-Andre Haldy, Tejen Kumar Basu, Michel Schaeer*

(Continued)

## ON THIS COVER

This month's cover is an artist's concept of the generalized ignition contour map shown in Figs. 1 and 2 from the paper by Mitarai et al.

## COLD FUSION

### TECHNICAL PAPER

- 313** Cold "Fusion": The Transmission Resonance Model Fits Data on Excess Heat, Predicts Optimal Trigger Points, and Suggests Nuclear Reaction Scenarios / *Robert T. Bush*

### TECHNICAL NOTES

- 357** Detection of Neutrons in Electrolysis of Heavy Water / *Tsutomu Sato, Makoto Okamoto, Poong Kim, Yasuhiko Fujii, Otohiko Aizawa*
- 364** Determination of the Excess Energy Obtained During the Electrolysis of Heavy Water / *V. C. Noninski, C. I. Noninski*
- 369** Deuterium Fusion Through Nonequilibrium Induction / *P. H. Fang*
- 371** Neutron and Gamma-Ray Emission from Palladium Deuteride Under Supercritical Conditions / *Jacob Jorne*
- 375** Thermal, Thermoelectric, and Cathode Poisoning Effects in Cold Fusion Experiments / *R. G. Keesing, R. C. Greenhow, M. D. Cohler, A. J. McQuillan*
- 380** Windows of Cold Nuclear Fusion and Pulsed Electrolysis Experiments / *Akito Takahashi, Toshiyuki Iida, Fujio Maekawa, Hisashi Sugimoto, Shigeo Yoshida*
- 391** Detection of High Tritium Activity on the Central Titanium Electrode of a Plasma Focus Device / *R. K. Rout, M. Srinivasan, A. Shyam, V. Chitra*

---

## DEPARTMENTS

- 199** Authors
- 395** Book Reviews
- Particle Accelerators—Applications in Technology and Research / reviewed by *William B. Herrmannsfeldt*
  - Mirror Matter, Pioneering Antimatter Physics / reviewed by *George H. Miley*
  - The Fourth State of Matter: An Introduction to the Physics of Plasma / reviewed by *Thomas J. Dolan*
