

fusion technology

CONTENTS / JANUARY 1997—VOL. 31, NO. 1

TECHNICAL PAPERS

- 1** Inertial Fusion Driven by Intense Cluster Ion Beams / *Claude Deutsch, Antoine Bret, Shalom Eliezer, José M. Martinez-Val, Naeem A. Tahir*

- 26** Design Risk Analysis Comparison Between Low-Activation Composite and Aluminum Alloy Target Chamber for the National Ignition Facility / *Holger H. Streckert, Robert W. Schleicher*

- 35** Radioactive Waste Disposal Characteristics of Candidate Tokamak Demonstration Reactors / *Edward A. Hoffman, Weston M. Stacey, Nolan E. Hertel*

- 63** Consistency of the Biphasic Nature of Excess Enthalpy in Solid-State Anomalous Phenomena with the Quasi-One-Dimensional Model of Isotope Loading into a Material / *Mitchell R. Swartz*

- 75** An Experimental Investigation of the Efficiency of HTO Reduction by Zr-Fe-Mn Getter Alloy / *Francesco Ghezzi, Walter T. Shmayda, Giovanni Bonizzoni*

- 106** Traveling-Wave Antenna for Fast-Wave Heating and Current Drive in Tokamaks / *H. Ikezi, D. A. Phelps*

DEPARTMENTS

- 118** Meeting Report
Summary of Seventh International Workshop on Carbon Materials,
Stockholm, Sweden, September 21–22, 1995 / *M. Rubel*

- 120** Letters to the Editor
Comments on Composite Electrolytes and Cold Fusion / *Alexandre E. Pozwolski*

Comments on the Possible Nature of “Cold Fusion” Phenomena / *A. V. Nedospasov, E. V. Mudretskaya*
