

NUCLEAR POWER REACTOR SAFETY (Presented at the ENS/ANS International Meeting, Brussels, Belgium, October 16-19, 1978)

PART ONE

TECHNICAL PAPERS

- 183 Common-Mode Failures in Redundancy Systems / *I. A. Watson, G. T. Edwards*
- 192 The Behavior of Concrete in Contact with Molten Corium in the Case of a Hypothetical Core Melt Accident / *Martin Peehs, Alfred Skokan, M. Reimann*
- 199 Test Prediction for the German PKL Test K5A Using RELAP4/MOD6 / *Yi-Shung Chen, William S. Haigh, L. Harold Sullivan, Stewart R. Fischer*
- 205 Parameter Study on the Influence of Prepressurization on PWR Fuel Rod Behavior During Normal Operation and Hypothetical LOCAs / *B. Brzoska, F. Depisch, H. P. Fuchs, W. Saueremann*
- 213 Comparisons Between Measured and FRAP-T4-Predicted Fuel Rod Failure Probability Under Pellet-Cladding Interaction Conditions / *Dennis R. Coleman*
- 220 The Axial Distribution of Deformation in the Cladding of Pressurized Water Reactor Fuel Rods in a Loss-of-Coolant Accident / *K. M. Rose, C. A. Mann, E. D. Hindle*
- 228 Failure Mechanisms and Fission Product Release in High-Temperature Gas-Cooled Reactor Fuel Under Conditions of Unrestricted Core Heatup Events / *W. Schenk, A. Naoumidis*
- 234 Modes of Failure of Fast Reactor Fuel Pins Irradiated Under Loss-of-Coolant-Flow Conditions / *H. Kwast*
- 241 An On-Line Meteorological Information System for Response to Accidental Releases of Radioactivity into the Atmosphere / *Helmut Peter Thomas*
- 248 Radionuclide Transport in Soil—Description and Application of a Computational Model / *K. Schwarzer*
- 255 Chemical Reactions Between Light Water Reactor Core Melt and Concrete / *Alfred Skokan, Helmut Holleck, Martin Peehs*
- 263 Modeling of Equiaxed Grain Growth in Uranium Dioxide Fuels / *William L. Baldewicz, Ahmed R. Wazzan, David Okrent*

(Continued)

ON THIS COVER

This month's cover is taken from a figure in the paper by W. H. Olson and W. E. Ruther. It shows the history of cesium in sodium with intermittent cesium-trap operation.

CONTENTS / DECEMBER 1979—VOL. 46, NO. 2

(Continued)

- 268 A New Approach for Rod-Bundle Thermal-Hydraulic Analysis / *W. T. Sha, H. M. Domanus, R. C. Schmitt, J. J. Oras, E. I. H. Lin, V. L. Shah*
- 281 Investigation of Local Cooling Disturbances in an In-Pile Sodium Loop in the BR2 / *W. Kramer, K. Schleisiek, L. Schmidt, G. Vanmassenhove, A. Verwimp*
- 289 Considerations on Incoherency of Boiling and Voiding in Liquid-Metal Fast Breeder Reactor Subassemblies During a Loss-of-Flow Accident / *R. Nijsing, W. Eifler*
- 300 The Influence of Meteorological Parameters on the Consequences of Accidental Activity Releases from Nuclear Power Plants / *Siegfried Vogt, Wolfgang G. Hübschmann*
- 306 The Fission Product Retention of Pebble-Bed Reactors in Ultimate Accidents / *K. Petersen, H. Barthels, H. E. Drescher, C. B. von der Decken, N. Iniotakis, W. Schenk, R. Schulten*
- 312 Tritium Contamination of the Product Gas in a High-Temperature Reactor Heated Process Plant / *W. Steinwarz, H. J. Cordewiner, H. D. Röhrig*
- 318 Controlling Cesium in the Coolant of the Experimental Breeder Reactor II / *W. H. Olson, W. E. Ruther*
- 323 A Revised ANS Standard for Decay Heat from Fission Products / *Virgil E. Schrock*
- 332 Attenuation of Airborne Debris from Liquid-Metal Fast Breeder Reactor Accidents / *H. A. Morewitz, R. P. Johnson, C. T. Nelson, E. U. Vaughan, C. A. Guderjahn, R. K. Hilliard, J. D. McCormack, A. K. Postma*
- 340 Steam-Water Mixing in Nuclear Reactor Safety Loss-of-Coolant Experiments / *Samuel A. Naff, William F. Schwarz*
- 344 In-Reactor Experiments on the Cooling of Fast Reactor Debris / *J. B. Rivard*
- 350 Acoustic Measurement of the Penetration of a Molten Metallic Pool into Concrete / *Herbert J. Sutherland*
- 356 Dryout Heat Fluxes in Debris Beds Cooled at the Bottom and Having Subcooled Liquid at the Top / *Vijay K. Dhir, Ivan Catton*
- 362 Multichannel Model for Fuel-Coolant Interaction in a Liquid-Metal Fast Breeder Reactor Subassembly / *Kent Mehr, Heinz M. Kottowski, Horst Goldammer*
- 369 A Theoretical Study of Reinforced Concrete Structures Under Missile Impact Loading / *Vladislav Adamik*
