CONTENTS / MARCH 1984—VOL. 64, NO. 3

## TECHNICAL PAPERS

### FISSION REACTORS

- 217 Development and Test of the Three-Dimensional Computer Code ZELT-3D for Unfolding Power Distributions Using Side Reflector Instrumentation Signals / *Paulo J. Knob, Ralf D. Neef, Hartwig Schaal*

### NUCLEAR SAFETY

- 229 An Event-Oriented Method for Determining Operation Guides Under Emergency Conditions in Boiling Water Reactors / *Yukiharu Ohga, Shunsuke Utena*

### CHEMICAL PROCESSING

- 237 Recovery of 3%-Enriched Uranium by Means of a Chemical Method / *Tetsuya Miyake, Kunihiko Takeda, Kazuo Imamura, Heiichiro Obanawa*

### NUCLEAR FUELS

- 243 Conceptual Design of a High-Burnup Fuel Rod for Boiling Water Reactors Using Low-Density UO<sub>2</sub> Pellets of an Annular Type / *Kazuo Hiramoto, Motoo Aoyama, Masaharu Sakagami, Renzo Takeda*

### ECONOMICS

- 249 Application of Value-Impact Methodology in the Design Analysis of a Nuclear Safety System / *Michael G. Stamatelatos, Daisy M. Ligon, Achilles G. Adamantiades*

### MATERIALS

- 268 Dynamic Fracture Toughness of Irradiated A533 Grade B Class 1 Pressure Vessel Steel / *K. Linga Murty, Regis P. Shogun, Warren H. Bamford*

### HEAT TRANSFER AND FLUID FLOW

- 275 Experimental Studies of Penetration of a Hot Liquid Pool into a Melting Miscible Substrate / *Gismar Eck, Heinrich Werle*

(Continued)

## ON THIS COVER

This month's cover is taken from a figure in the paper by T. Miyake et al. and shows the distribution of chemical species in the uranium adsorption zone.

# CONTENTS / MARCH 1984–VOL. 64, NO. 3

(Continued)

- 290** Transit Time of Mixed High Pressure Injection Water and Primary Loop Water in Pressurized Water Reactor Cold Legs / *Bill K.-H. Sun, Seung Oh, Paul H. Rothe*

## TECHNIQUES

- 300** Tritiated Water Measurements with a  $^2\text{D}(\gamma, n)^1\text{H}$  Detector / *Willard G. Winn, Norman P. Baumann*

## DEPARTMENTS

- 213** Authors
- 307** Book Reviews
- 309** Letters to the Editor
