## POSTACCIDENT DEBRIS COOLING

9 Editors' Note / *Karl Wirtz, Roy G. Post*

## TECHNICAL PAPERS

- 10 Dryout of an Inductively Heated Bed of Steel Particles with Subcooled Flow from Beneath the Bed / *F. P. Tsai, J. Jakobsson, I. Catton, V. K. Dhir*
- 16 Modes of Heat Removal from a Heat-Generating Debris Bed / *D. Squarer, L. E. Hochreiter, A. T. Pieczynski*
- 23 On the Pattern of Water Penetration into a Hot Particle Bed / *D. H. Cho, Donn R. Armstrong II, S. H. Chan*
- 32 Radiative Contribution to the Heat Transfer in Liquid Urania / *M. Bober, J. Singer, K. Wagner*
- 36 On the Location and Mechanisms of Dryout in Top-Fed and Bottom-Fed Particulate Beds / *G. Hofmann*
- 46 Mechanical Behavior of SNR-300 Reactor Vessel Components Under Postaccident Heat Removal Conditions / *Hartwig Laue, Klaus Hermann Kerz*
- 53 A Coolability Model for Postaccident Nuclear Reactor Debris / *Ronald J. Lipinski*
- 67 Cooling of Debris Beds / *Leopold Barleon, Klaus Thomauske, Heinrich Werle*
- 87 Light Water Reactor Debris from Severe In-Pile Transient Tests / *Richard R. Hobbins, Beverly A. Cook, Richard E. Mason*

---

## NUCLEAR SAFETY

- 92 Steam Generator Leak Detection in Liquid-Metal Fast Breeder Reactors by Chemical Methods / *George J. Licina, Dwight R. Springer, Prodyot Roy*

## FUEL CYCLES

- 102 Nonsoluble Fission Product Residues, Crud, and Fine Chips of Zircaloy Cladding in Headend Process of Nuclear Fuel Reprocessing / *Kozo Gonda, Koichiro Oka, Keiichi Hayashi*

(Continued)

## ON THIS COVER

This month's cover is taken from two figures in the paper by Dienst et al. showing chemical interactions between molten Zircaloy-4 and UO<sub>2</sub> crucibles at 1800 to 2000°C as a function of time.

# CONTENTS / APRIL 1984–VOL. 65, NO. 1

(Continued)

## NUCLEAR FUELS

- 109 Chemical Interactions Between  $UO_2$  and Zircaloy-4 from 1000 to 2000°C  
*Wolfgang Dienst, Peter Hofmann, Deborah K. Kerwin-Peck*

## RADIOACTIVE WASTE MANAGEMENT

- 125 On the Applicability of Analytical Solutions of the Transport Equation for the Migration of Substances in Groundwater-Bearing Horizons / *Marion Petschel, Dietmar Zappe*
- 131 The Effect of Composition of Selected Groundwaters from the Basin and Range Province on Plutonium, Neptunium, and Americium Speciation / *Terry F. Rees, Jess M. Cleveland, Kenneth L. Nash*

## MATERIALS

- 138 Investigation of Oxides Formed in the Corrosion of SUS-304 in High-Temperature Water Through the Measurement of Evolved Hydrogen and Radiochemical Analyses / *Enzo Tachikawa, Michio Hoshi, Chiaki Sagawa, Chushiro Yonezawa, Mikio Nakashima*

## HEAT TRANSFER AND FLUID FLOW

- 146 Scaling Criteria for Two-Phase Flow Loops and Their Application to Conceptual  $2 \times 4$  Simulation Loop Design / *Gunol Kocamustafaogullari, Mamoru Ishii*

## TECHNIQUES

- 161 Paint Decontamination Kinetics / *Edward W. Thornton*

## DEPARTMENTS

- 1 Authors
- 168 Book Reviews
