

# Fusion Science and Technology

CONTENTS / OCTOBER 2014—VOL. 66, NO. 2

## TECHNICAL PAPERS

- 301** Synergistic Effects in Reduced-Activation Martensitic Steel Under Single and Sequential Helium/Hydrogen Ion Irradiation / *Jihong Chen, Liping Guo, Fengfeng Luo, Tiecheng Li, Yaoyao Ren, Jinping Suo*
- 308** Picosecond and Nanosecond Laser Ablation of Mixed Tungsten/Aluminum Films / *M. Wisse, L. Marot, R. Steiner, D. Mathys, A. Stumpp, M. Joanny, J. M. Travère, E. Meyer*
- 315** Fabrication of Tungsten-Vanadium Hybrid Material with Sufficient Toughness for High-Temperature Applications by Diffusion Bonding / *Widodo Widjaja Basuki, Prachai Norajitra, Luigi Spatafora, Jarir Aktaa*
- 322** Estimation of Melting Points for Some Binary and Tertiary Fluoride Molten Salts / *Satoshi Fukada, Akira Nakamura*
- 337** Influences of Dispersed Lanthanum Oxide Additive on the Properties of Tungsten-Based Plasma-Facing Material / *D. H. Zhu, J. L. Chen, Z. J. Zhou, R. Yan, R. Ding*
- 343** Thermal and Structural Issues of Target Injection into a Laser-Driven Inertial Fusion Energy Chamber / *Robin Miles, Allan Chang, Francesco Fornasiero, Mark Havstad, Sergei Kucheyev, Mary Leblanc, Paul Rosso, Greg Schebler*
- 349** Parameter Study of an Inertial Fusion Energy Chamber Response Using the 1-D BUCKY Radiation Hydrodynamics Code / *Ryan Sacks, Gregory Moses, Vincent Tang, Kevin Kramer, Howard Scott, James Demuth*

## TECHNICAL NOTE

- 358** Introduction of an Electron Beam from a Secondary Emission Magnetron Injection Gun into a Closed Magnetic Trap / *S. A. Cherenshchykov*
